

Subject: - MLO Code in Voyage Registration

PCS 1x is currently in the process of API Integration with ICEGATE.

For VCN API with ICEGATE, as per requirement of Customs Authorities we need to transmit the PAN Number of MLO Code. For this reason, PCS1x has added this field ,on the voyage registration page.

Shipping Agents / Shipping Lines need to update the PAN Number of MLO while requesting the VCN with Port Authorities.

All users are hereby requested to ensure that the PAN Card Number of the Main Line Operator is input in the MLO PAN field on the Voyage Registration page.

The screenshot displays the 'Voyage Registration' form in the PCS 1x system. The form is organized into a grid of input fields. At the top, there is a navigation bar with 'Dashboard', 'Trade', 'EXIM', 'Vessel Activity', and 'Voyage Registration'. Below this, there are tabs for 'Voyage Details', 'Dumb Vessel Details', and 'Cargo Details'. A note states: 'Provide Below Details, Fields Marked * Are Mandatory'. The form fields include:
